Math for Living Seamstresses

Beth makes clothes for a living. She has been given an order for a skirt, an order for a blouse, and another for a pair of dress pants.

Beth knows where she can buy some material at a bargain that would be good for all three orders. She figures that she will need 2 metres of material for the skirt, 1 metre of material for the blouse, and 3 metres for the pants.

How much material in total will Beth need to buy in order to meet all three orders?

Math for Living Caterers

Beth works for a catering company. One of her many duties is to book and manage meeting rooms that are rented out to customers. Salon A is large enough for 25 people and Salon B has room for 35 people.

Burr's Bits and Feedbags Inc. has booked Salon A to offer a training workshop to 17 of its employees. They have just gotten word at the last minute that there will be an additional 14 employees coming in from their out-of-town office.

How many employees in total will be attending the training workshop? Should Beth book them into Salon A or Salon B?

Subtracting Tens

To subtract numbers in the tens:

for example

$$\begin{array}{r} 78 \\ -19 \\ \hline \end{array}$$

Step 1 Subtract the ones

$$\begin{array}{r} 78 \\ -19 \\ \hline \end{array}$$

$8 - 9 = ?$

 Since 9 is greater than 8 you cannot subtract 9 from 8. First, you must borrow from the tens.

Step 2 Borrow one from the tens

7 tens minus 1 ten becomes 6 tens.

8 ones plus 1 ten becomes 18 ones.

$$\begin{array}{r} 61 \\ \cancel{7}8 \\ -19 \\ \hline \end{array}$$

Step 3 Subtract the ones.

$$\begin{array}{r} 6 \text{ } 11 \text{ } 13 \\ \cancel{7} \cancel{2} \cancel{8} \\ - 435 \\ \hline 88 \end{array}$$

$$18 - 9 = 9$$

Step 4 Subtract the tens.

$$\begin{array}{r} 6 \text{ } 11 \text{ } 13 \\ \cancel{7} \cancel{2} \cancel{8} \\ - 435 \\ \hline 288 \end{array}$$

$$6 - 1 = 5$$

Subtract the numbers.

$$\begin{array}{r} 46 \\ -37 \\ \hline \end{array} \quad \begin{array}{r} 81 \\ -4 \\ \hline \end{array} \quad \begin{array}{r} 83 \\ -79 \\ \hline \end{array} \quad \begin{array}{r} 72 \\ -19 \\ \hline \end{array} \quad \begin{array}{r} 77 \\ -39 \\ \hline \end{array}$$

$$\begin{array}{r} 57 \\ -29 \\ \hline \end{array} \quad \begin{array}{r} 60 \\ -54 \\ \hline \end{array} \quad \begin{array}{r} 65 \\ -6 \\ \hline \end{array} \quad \begin{array}{r} 64 \\ -35 \\ \hline \end{array} \quad \begin{array}{r} 91 \\ -69 \\ \hline \end{array}$$

$$\begin{array}{r} 96 \\ -29 \\ \hline \end{array} \quad \begin{array}{r} 57 \\ -28 \\ \hline \end{array} \quad \begin{array}{r} 60 \\ -25 \\ \hline \end{array} \quad \begin{array}{r} 82 \\ -79 \\ \hline \end{array} \quad \begin{array}{r} 77 \\ -58 \\ \hline \end{array}$$

Math for Living Parents

Jane has a six-year-old son named Bobby. It is Halloween night and Bobby has come home with 12 small bags of chips among his loot.

Jane has told Bobby that, "starting now", he will be allowed to eat three bags of chips out of his loot bag per day.

If Bobby eats all of the chips that he is allowed to eat tonight, how many bags of chips will he have left by tomorrow morning?

[Click here for answer](#)

Math for Living Kids

Bobby has two quarters, 

three pennies, 

two nickels, 

and one dime. 

How much money does Bobby have?

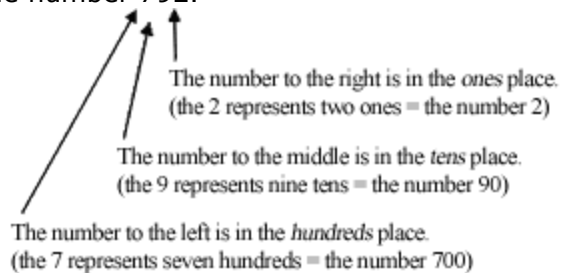

If Bobby spends 25¢ on a large bubblegum, how much money will he have left?

Math for Living Truck Drivers

Mike is a truck driver in the city. He gets paid according to how much weight he hauls in the run of a day. It is important for him to add up and mark down the total weight of the freight on his truck before returning to the terminal.

Mike picked up an engine block at a garage weighing 224 kilograms, a 127-kilogram box of fittings at a fencing company, and a 456-kilogram skid of auto parts. What was the total weight of cargo being carried on his truck when he returned to the terminal that day?
